Johor Bahru, Johor

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3 years of experience building production web, mobile, and data systems for fintech and government sectors. Proficient in TypeScript, Node.js, NestJS, Laravel, Vue.js, and React Native, with strengths in API security, authentication design, third-party integrations, and technical leadership. Led delivery of a cross-platform crypto wallet (iOS/Android), a Power BI reporting ecosystem, and a national-scale kindergarten management platform serving 5,000+ centres. Experienced in sprint planning, mentoring junior developers, and shipping reliable software in fast-moving teams.

EXPERIENCE

Mechanikos Sdn. Bhd. **Aug 2026 - Present**
Full Stack Developer

- Accelerated delivery momentum within the first week by restructuring sprint planning, proper ticketing, backlog prioritisation, and module ownership across a multi-module government platform.
- Led a team of 6 junior developers, conducting code reviews, unblocking technical decisions, and aligning backend (Laravel) and frontend (Vue 3, TypeScript) work across parallel feature streams.
- Directed full-stack development for SPTK, a national MIS digitising operations for 5,000+ TABIKA preschool centres under KEMAS (Ministry of Rural and Regional Development), covering registration, GPS-verified attendance, digital library, and role-based access across centre/district/state/HQ hierarchies.
- Established engineering quality practices including Playwright E2E test coverage, TypeScript strict-mode standards, and structured API/repository patterns to support long-term maintainability at scale.
- Coordinated cross-module delivery (system management, registration & attendance, digital library, finance) while maintaining production stability for staging and pre-production government environments.

Rapidz Inc. @ Clarity Techworks Sdn. Bhd. **Oct 2023 - May 2026**
Software Engineer (Backend / Full-Stack)

- Reduced authentication-related security exposure by implementing server-to-server HMAC request signing with replay-attack protection across internal service-to-service communication on the Rapidz platform.
- Improved reliability for 2FA, biometric, and OAuth flows by engineering a JWT (RS256) access and refresh token system with automated revocation, used across multiple client applications.
- Maintained product continuity across vendor transitions by onboarding and integrating third-party providers with minimal end-user disruption.
- Accelerated executive decision-making by architecting a Power BI reporting ecosystem from scratch, delivering real-time visibility into revenue and campaign performance.
- Increased developer velocity by contributing to migration from Laravel/PHP to NestJS and React Native, improving cross-platform UI consistency and iteration speed.
- Enhanced production reliability by integrating Sentry-based error tracking and standardised exception handling, reducing time-to-resolution for incidents.

Intel Technology Sdn. Bhd. **Oct 2022 - Feb 2023**
Software Engineer Intern

- Diagnosed, fixed, and integrated a system GUI with underlying Perl and Python scripts, enabling reliable mass deployment across multiple Intel departments.
- Authored user manuals and end-user testing protocols that accelerated stakeholder adoption of complex tooling.
- Gained hands-on experience in chipset design verification using Python, Perl, Tk, Verilog, and SystemVerilog on Unix/Linux environments.
- Collaborated with cross-geo engineering teams (USA, India) through design meetings and knowledge-sharing sessions.

EDUCATION

Universiti Teknologi Malaysia — Bachelor of Computer Science (Software Engineering)
2019 - 2023 | CGPA: 3.88

Kolej Matrikulasi Johor — KPM Matriculation Certificate
2018 - 2019 | CGPA: 3.75

TECHNICAL SKILLS

- **Languages :** TypeScript, JavaScript, PHP, Java, SQL
- **Backend & APIs :** Node.js, NestJS, Laravel, REST APIs, Swagger
- **Frontend :** Vue.js 3, React Native, Next.js, Pinia, Tailwind CSS, Vite
- **Database & ORM :** PostgreSQL, MySQL, Prisma
- **Testing & Quality :** Playwright, ESLint, Prettier
- **DevOps & Tooling :** Git, GitHub, Docker, Sentry, npm, Postman, Axios
- **Data & Reporting :** Power BI, DAX

LANGUAGES

- **Bahasa Melayu :** Native Speaker
- **English :** Fluent
